

Activity Outline

Activity Name: Advisory notices

Principle:

Sober drivers

Safe speeds

No distractions

Avoiding risks

Driving to the conditions

Building experience

Summary: Put advisory notices on the windscreens of student and staff cars at school to raise awareness of key road safety issues. These advisory notices include information about the potential consequences and tips for how to do the right thing.

Current Available Resources:

- There are 4 templates available on the SADD website to download and print. These have all of the information needed. You can find these downloads here:
<https://sadd.org.nz/downloads-and-links>

Notes:

- Consider when is a good time to do this activity to have the most students see them. A free period is a good time as most students' cars will be in the car park.
- You can also put a follow up notice in the school notices or address the school in assembly to reinforce the information.
