

Activity Outline

Activity Name: Chalk Outlines

Principle:

Sober drivers

Safe speeds

No distractions

Avoiding risks

Driving to the conditions

Building experience

Summary: Using chalk, draw body outlines and relevant pictures on an area of concrete at school and write safe driving messages inside/alongside these. You can use stats and facts or positive SADD messages to raise awareness and get people thinking.

Current Available Resources: The SADD website has information and links to find some interesting and relevant road safety statistics.

Notes:

Consider where you are going to draw the outlines. A high traffic area at school where lots of people will see your work is best.

Use Facebook and school notices to promote the activity.
